TECHNOLOGIES & SKILLS

Python, JavaScript, React.js, Redux.js, Node.js, Express.js, Styled-Components, Mocha.js, Chai.js, Jest, Flask, SQLAlchemy, MongoDB, PostgreSQL, SQL, HTML5, CSS3, Git, AWS S3, Docker, Linux bash scripting and navigation

PROJECTS

CoffeeHub   Github | Live Site
Social platform to help coffee roaster enthusiasts create, store, and share their roasts
React / Python / Flask / SQLAlchemy / Postgres / AWS / D3 / Styled-Components / Docker
- Utilized Rechart and D3 for rendering dynamically created graphs based on real time user input.
- Manipulated JavaScript Date class to dynamically create a clickable svg grid 'garden' of all roasts made in the previous year, modeled after Github's repository 'garden'.
- Designed and utilized a custom made component library to DRY up the code base.

JavaScript-Trivia   Github | Live Site
Trivia game and API with questions about JavaScript in 10+ languages
React / Express / Gatsby / Node.js / MongoDB / Jest
- Constructed Mongo database with 10 collections, 1000+ documents, and utilize database normalization principles to optimize storage and efficient querying.
- Served JS trivia questions via RESTful API on Express server.

Isn'tgram   Github | Live Site
Full stack photo sharing app modeled after Instagram
React / Python / Flask / SQLAlchemy / PostgreSQL / Styled-Components / AWS S3 / Docker
- Architected backend schema to connect the React frontend to a Postgres database through a RESTful API.
- Built each component with a mobile first approach using styled-components that make for a beautiful user experience on all screen sizes.
- Stored images in AWS S3 bucket to reduce server load and allow for scalability.

Slick   Github | Live Site
Workplace communication app modeled after slack
React / Redux / Node.js / Express / Sequelize / Postgres / AWS
- Leveraged Redux to handle all high level state changes and present complex data relationships clearly.
- Integrated autocomplete search functionality on all search forms using Material UI component library.

PROFESSIONAL EXPERIENCE

Holtz Leather Co., Huntsville, AL
Customer Service Lead (April 2019 - Feb 2020)
- Responsible for strategic vision, planning, and daily operations for 6 team members, responding to 1,000 customers per day during peak season.

Fairfield Inn & Suites Marriott, Auburn, AL
General Manager (October 2017 - November 2018), Front Desk Manager (June 2016 - October 2017)
- Directed operations and business functions for a 74-room property, with $3 million in annual revenue, four departments and thirty employees.
- Improved guest satisfaction scores from bottom 10% to top 20% of all Fairfield Marriott hotels.

EDUCATION

App Academy, software engineering
6 month immersive software engineering bootcamp
Educational topics include: Javascript, Python, React, Redux, Flask, TDD, SQL, specification writing, HTML, CSS, GIt

Auburn University, Auburn, AL : 2 years completed
Pursued Bachelor of Science in Business Administration
